Sir:

In response to the Official Action of November 20, 1989,
please amend the above-identified application as follows.

IN THE CLAIMS

Please amend claims 21 through 23 and 26 as follows.

CM | 21. (Three times amended) A tubular protective device for
protection against a transfer of infectious matter during sexual
intercourse consisting of:

D/ P (a) a flexible, thin-walled tube having a sufficiently
large first diameter to permit movement of a penis
within said tube during coitus, said tube having a
closed end and an open end, said open end having;
